Installation

 You will require to install MageDelight Base Extension first. If it is not installed then please download it from <https://www.magedelight.com/pub/extensions/magedelight-base.zip> and unzip the package file into the root folder of your Magento 2 installation.

 Before installing the extension, please make sure to **Backup your web directory and store database**

 You will require to install MageDelight Base Extension first. If it is not installed then please download it from <https://www.magedelight.com/pub/extensions/magedelight-base.zip> and unzip the package file into the root folder of your Magento 2 installation.

 Root Directory is - "**app/code/magedelight/#YourExtensionName#**"

- Unzip the extension package file into the root folder of your Magento 2 installation.
- Connect to SSH console of your server:
 - Navigate to the root folder of your Magento 2 setup
 - Run command as per below sequence,

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:di:compile
```

```
php bin/magento setup:static-content:deploy
```

```
php bin/magento cache:clean
```

- log out from the backend and log in again

If you are using Magento 2.3 or later then you do not need to activate license. Extension will be activated with silent activation mechanism and does not require activation keys to be entered manually.

Backend Configuration (Admin side)

⊖ SagePay Payment Gateway

⊖ SagePay Global Setting

| | |
|--|---|
| Vendor Name <small>[website]</small> | <input type="text" value="Test"/> |
| Test Mode <small>[website]</small> | <input type="text" value="Yes"/> ▼ |
| User <small>[website]</small> | <input type="text" value="testuser"/> |
| Password <small>[website]</small> | <input type="password" value="....."/> |
| Enable 3D Secure <small>[store view]</small> | <input type="text" value="Use default MySagePay settings"/> ▼ |
| Apply AVS CVC Check <small>[store view]</small> | <input type="text" value="Use default MySagePay settings"/> ▼ |

- **Vendor Name:** Provide Vendor name registered with Merchant.
- **Test Mode:** Select "Yes" to enable test payment mode on website.
- **Username:** Provide registered user name with merchant account.
- **Password:** Provide password set with merchant account.
- **Enable 3D Secure:** Set "Yes" to enable 3D security for transaction performed on this website.
 - **Use default MySagePay settings:** Select this option to perform 3D payment as per your configuration of merchant panel.
 - **Apply authentication even if turned off:** Select this option to perform 3D payment by ignoring merchant panel configuration and enabled authentication forcefully.
 - **Disable authentication and rules:** Select this option to perform 3D payment by ignoring merchant panel configuration and disable authentication forcefully.
 - **Apply authentication but ignore rules:** Select this option to perform 3D authentication by ignoring merchant panel rule configuration.
- **Apply AVS CVC Check:**
 - **Use default MySagePay settings:** Select this option to perform 3D payment as per your configuration of merchant panel.
 - **Apply authentication even if turned off:** Select this option to perform 3D payment by ignoring merchant panel configuration and enabled authentication forcefully.

- **Disable authentication and rules:** Select this option to perform 3D payment by ignoring merchant panel configuration and disable authentication forcefully.
- **Apply authentication but ignore rules:** Select this option to perform 3D authentication by ignoring merchant panel rule configuration.

Payment Action [store view]

- **Enabled:** Set "Yes" to enable SagePay payment on website.
- **Vault Enabled:** Set "Yes" to enable vault for SagePay cards. This means, you can save card for this merchant for future usage.
- **Title:** Provide title of the payment methods displayed at store front.
- **PI Integration Key:** Provide integration key provided by SagePay. You will also find this key from SagePay merchant account.
- **PI Integration Password:** Provide integration password provided by SagePay. You will also find this password from SagePay merchant account.
- **Enable CVV for Saved Card:** Set "Yes" to make CVV input required while payment using save card.
- **Drop-in Interface:** Set "Yes" to enable drop-in-interface.
 - **Drop-in Display:** SagePay drop-in-display has two types of user interfaces listed as below,
 - **Modal UI:** Select "Model UI" to display payment processing interface as popup model.
 - **Inline UI:** Select "Model UI" to display payment processing interface as native Magento.
- **Payment Action:** Set action as per your requirements,
 - **Authorize and Capture (Payment):** Authorize and Capture enables you to make instant payment transfer from customers card to merchants account on generation of invoice.
 - **Authorize Only (Deferred):** Authorize enables you to authorize fund availability but delay fund capture, this means this will block fund in customers card but does not transfer fund to merchants account. When Merchant will generate invoice then fund will be transferred or merchant can capture it manually from merchant panel.
