customer_email	category_id	discount	website
veronica_costello@magedelight.com	23	10	1
veronica_costello@magedelight.com	4	15	1

Backend Functionality

Price per customer extension will allow to set customer specific price of same product. With two way you can set special price, one is to select customers from edit product and another is to selected products from edit customer.

1. Set Price Per Customer From Manage Product

On product edit you would be see one new tab with titled "Price Per Customer". This tab will allow you to choose customers to whom you required to give discounted price. You can define product quantity and price of product per quantity.

- **Special Price:** : If assign a discount with single quantity of product only to particular customer, it would consider it as special price of product to respective customer. For example as shown in below screenshot customer veronica Costello has been given special price of 25\$ on product Joust Duffle Bag. But the actual price of product is \$35.

- **Tier Price:** If discount is assign with range of quantity that would be the tier price of product to customer. As shown in below screenshot, Veronica Costello have given three different price for different quantity. That is special price of 30\$ for quantity 1, 25\$ for quantity 2, 20% off on quantity 3 of product Driven Backpack.

- **Fix Price Or Discounted in Percentage:** You can set the discounted price with fix price Or you can also set the price with percentage of original product price. For that you would require to add percentage symbol (%) after the price. As shown in above screenshot.
- **Bundle Product Type:** You can set fixed and percentage price discount with quantity for associated products of the bundle products. You have to set price for associated products of the bundle.

- **Group Product Type:** Group product type would not support, special price or tier price. But you can set discounted price to respective associated product to group product type.

2. Category Per Customer

Category ID	Category Name	Discount	Action
14	Jackets	15 %	Remove Category
12	Tops	20 %	Remove Category
4	Bags	30 %	Remove Category

In Customer tab, go to all customers and select any one customer for whom special price of one or multiple categories needs to be set.

There is Category Per Customer tab, click on the tab and “Add Category” button to add discount on categories. Once you save the category, it will apply discount on all products of the category. Only percentage type is allowed to set the discount on category. Also discount can be removed from category by clicking on “Remove Category” button.

3. Set Price Per Customer From Manage Customer

Product ID	Product Name	Price	Special Price	Qty	Action
2067	Test Bundle Product	\$500.00	10	1 and above	
2062	Bundle Product : Simple Associated Product 3	\$120.00	10	1 and above	
2061	Bundle Product : Simple Associated Product 2	\$100.00	10	1 and above	
2058	PLFL	\$150.00	120	1 and above	
2057	Admin Special Price	\$100.00	90	1 and above	
1	Joust Duffle Bag	\$34.00	15	1 and above	

Discount on all products (%)

Price per customer can be also managed from edit customer too. While you edit any particular customer, you will see one tab called “**Price Per Customer**”. With this tab admin can select various products and set special price or tier price for products.

As we have discussed with manage product tab, we can manage Special Price, Tier Price, fix price, Discount in percentage, Bundle product and group product with each product with here too.

Discount on all product: From here you can give fix percentage of discount with all products. If you set this option for any customer, Customer will get particular amount of discount throughout the site for all product. This discount would not be applicable for those products, if price per customer is set on products.

Frontend Functionality

Once the extension id properly configured at backend as above described, your customer can avail special offers you have set for them.

1. Set Price Per Customer From Manage Customer

Price per customer extension give you option to show a separate page for customer. This page will content list of products on which, the customer have given discount with Price Per Customer options.

i Only login customer can access this offer page. The link title and the offer page title can be manage from admin configuration setting. Page URL identifier can also manage from admin configuration for SEO friendly URL. As shown with above screenshot.

2. Product price block

Based on price set for product, the price block will be render with two different types.

a. Special Price

b. Tier Price

Home > Gear > Bags > Joust Duffle Bag

Joust Duffle Bag
