Backend Configuration (Admin side)

Merge Order Settings

Enable Merge Order [global]

Yes

Validate Qty [global]

No

Validate Product Qty When Combining multiple profiles into single order ?

Fail Order if Fail Addtocart [global]

No

When adding product to cart from Multiple Subscription, if any subscription item is failed to add to cart for any reason like out of stock or something, Should system fail all the subscriptions or it should fail only that specific subscription and go ahead with other subscription

- **Enable Merge Order:** Set Yes, to enable order merger functionality for your store if customer has multiple subscription profile and it generates orders on same day. It will merge only if subscription date, shipping address, payment methods are common for all the profiles.
- **Validate Qty:** Set Yes, if you want to Validate Product Qty when combining multiple profiles into single order. If set to No, it will not restrict product quantity while combining multiple subscription profiles.
- **Fail Order if Fail Addtocart:** Set Yes, if you want to fail the order when adding product to cart from multiple subscription and any subscription item is failed to add to cart for any reason. For example, out of stock, etc. Should system fail all the subscriptions or it should fail only that specific subscription and go ahead with other subscription?
