# Installation

 To use this extension, you will require to install MageDelight Base Extension first. If it is not installed then please download it from <https://www.magedelight.com/extensions/magedelight-base-extension.zip> and unzip the package file into the root folder of your Magento 2 installation.

 Before installing the extension, please make sure to **Backup your web directory and store database**

- Unzip the extension package file into the root folder of your Magento 2 installation.
- Connect to SSH console of your server:
  - Navigate to the root folder of your Magento 2 setup
  - Run command as per below sequence,

```
php -f bin/magento setup:upgrade
```

```
php -f bin/magento module:enable Magedelight_SEOPro
```

```
php -f bin/magento setup:static-content:deploy
```

- Flush store cache
- log out from the backend and log in again

## Backend Configuration (Admin side)

### SEO Pro Configuration

#### Search Settings

### Search Settings

Custom URL Key for Search Page [global]

Search Page URL Key [global]

- **Custom URL Key for Search Page:** Select "Yes" to enable custom URL key for search page
- **Search Page URL Key:** Provide custom search page key

#### 404 Settings

## 404 Settings

404 Page Redirection  
[store view]

Custom Search Module

Instead of landing Customer to 404 page, we suggest to take him to search results page to increase sales possibility.

404 Page Redirection - Custom Module  
Slug  
[store view]

- **404 Page Redirection:** Enable search for 404 page redirection when user comes to wrong URL of the store. You can select No (not redirect to search, default search or custom search redirection options)
- **404 Page Redirection - Custom Module Slug:** Provide custom search page slug if any third party search installed.

## Canonical URL Settings

### Canonical URL Settings

Enable  
[store view]

Yes

[Click here](#) to know what is Canonical URL

Category Path in Product URL  
[store view]

Default Rules

301 Redirect to Canonical URL  
[store view]

No

- **Enable:** Select "Yes" to enable canonical URL.
- **Category Path in Product URL:** Select category path to generate canonical URLs. You can select shortest path, longest path or URL without categories from the options.
- **301 Redirect to Canonical URL:** Select "Yes" to 301 redirection using canonical URLs.

## Pagination Settings

## Pagination Settings

This will be applicable to Category Product Listing Page.

Add Link Rel="next/prev"  [store view]

Add Page Number to Meta Title  [store view]
