Installation

Before installing the extension, please make sure to **Backup your web directory and store database**

You will require to install MageDelight Base Extension first. If it is not installed then please download it from https://www.magedelight.com/pub/extensions/magedelight-base.zip and unzip the package file into the root folder of your Magento 2 installation.

Root Directory is - **"app/code/magedelight/#YourExtensionName#"**

- Unzip the extension package file into the root folder of your Magento 2 installation.
- Connect to SSH console of your server:
  - Navigate to the root folder of your Magento 2 setup
  - Run command as per below sequence,

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:di:compile
```

```
php bin/magento setup:static-content:deploy
```

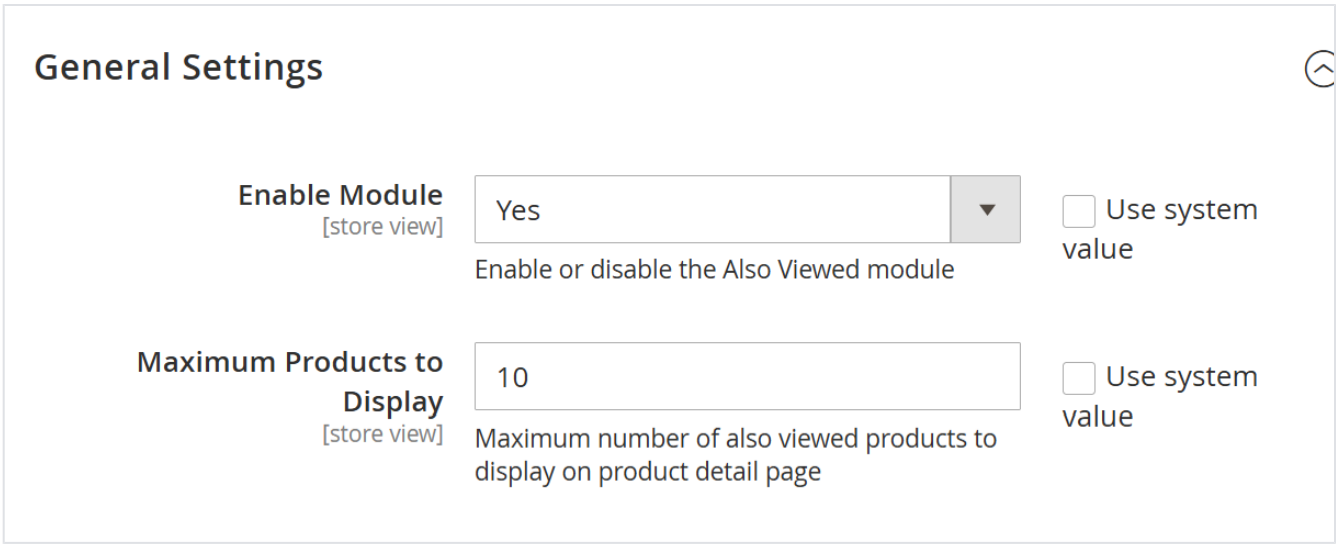
```
php bin/magento cache:clean
```

- log out from the backend and log in again

If you are using Magento 2.3 or later then you do not need to activate license. Extension will be activated with silent activation mechanism and does not require activation keys to be entered manually.

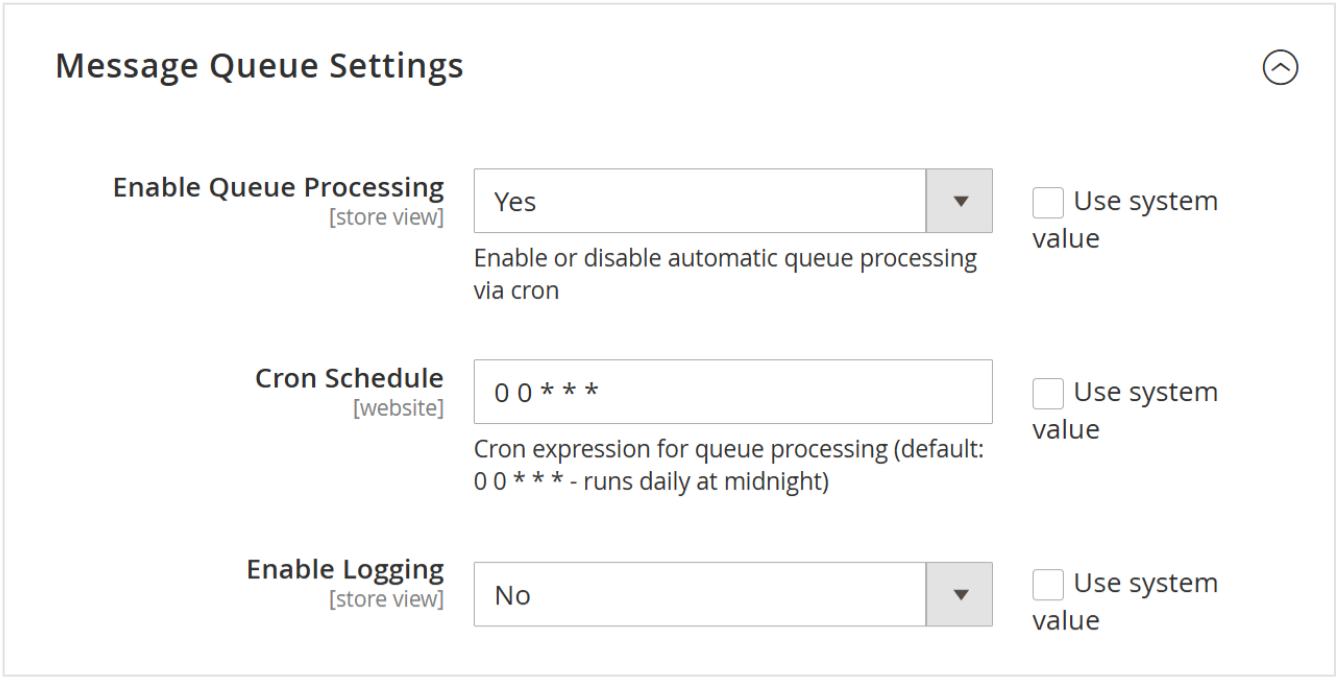
Backend Configuration (Admin side)

Copyright © 2021. MageDelight. All Rights Reserved.



- **Admin Panel MageDelight Also Viewed Products ConfigurationGeneral Settings**

Field	Description
Enable Module	Enables or disables the *Also Viewed Product* feature at the store view level. Select **Yes** to activate the module functionality on the storefront. Select **No** to disable the feature.
Maximum Products to Display	Defines the maximum number of “Also Viewed” products to display on the Product Detail Page (PDP). The system will show up to the configured number of associated products based on the calculated view weight logic.

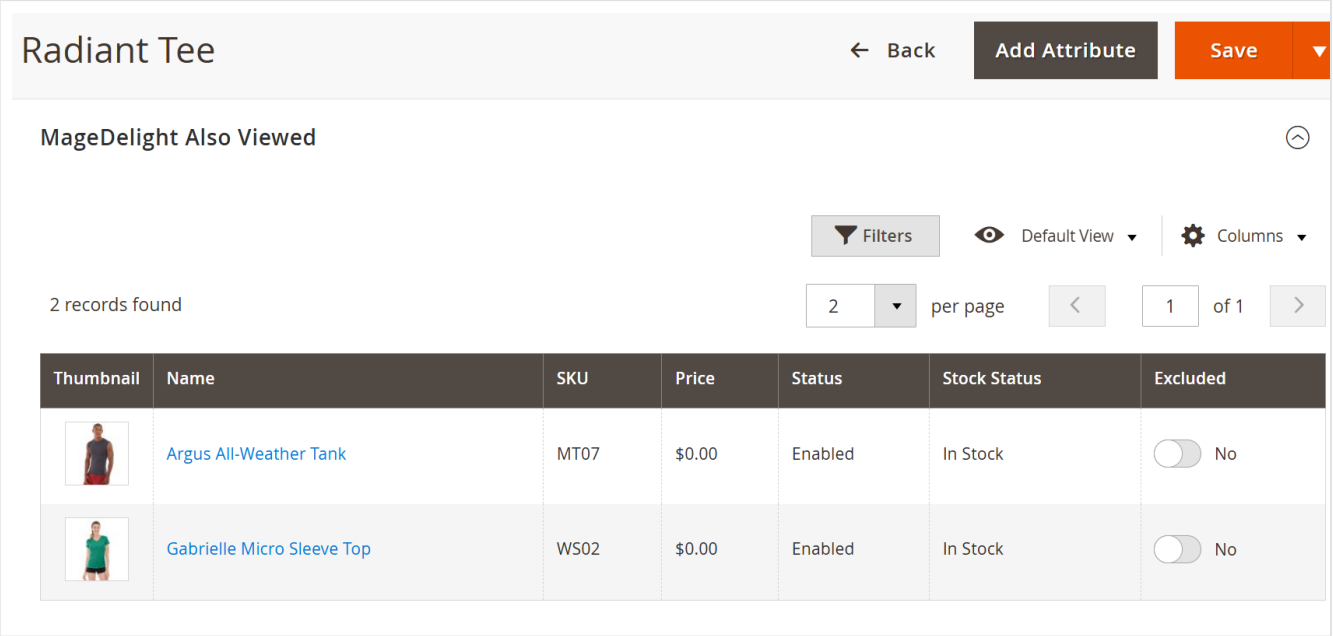


Field	Description
Enable Queue Processing	Enables or disables automatic message queue processing via CRON. Select **Yes** to allow the system to process queued product view associations automatically. Select **No** to disable automatic processing.

Copyright © 2021. MageDelight. All Rights Reserved.

Cron Schedule	Defines the CRON expression used to process the message queue. The default value `0 0 * * *` runs the queue processing daily at midnight. Merchants may adjust the schedule based on store traffic and performance requirements.
Enable Logging	Enables or disables system logging for queue processing activities. Select **Yes** to generate logs for debugging and monitoring purposes. It is recommended to disable logging in production environments unless troubleshooting is required.

Backend Functionality



- **Admin Panel Catalog Products Select Product MageDelight Also Viewed**
- The **MageDelight Also Viewed** section is available within each product's edit page in the Admin Panel.
- This section displays a list of all products that have been frequently viewed together with the selected product based on real customer browsing behavior.
- For example, in the case of the **"Radiant Tee"** product (as shown in the screenshot), the system displays associated products that customers have viewed alongside this item.

Column	Description
Thumbnail	Displays the product image for quick visual identification.
Name	Product name of the associated item.
SKU	SKU of the associated product.
Price	Current product price.
Status	Indicates whether the product is enabled or disabled.
Stock Status	Displays product availability (In Stock / Out of Stock).
Excluded	Allows administrators to exclude a product from appearing in the "Frequently Viewed Together" slider for this specific product.

Frontend Functionality – Customers Who Viewed This Item Also Viewed

- Displays a dedicated **“Customers Who Viewed This Item Also Viewed”** section on the Product Detail Page (PDP).
- Automatically showcases products that were frequently viewed together with the current product.
- Uses a **weighted co-view algorithm** to prioritize the most relevant product suggestions.
- Updates dynamically based on real customer browsing behavior.
- Requires **no manual configuration** or product assignment.
- Enhances product discovery and improves cross-sell opportunities.
- Helps increase **Average Order Value (AOV)** through behavior-driven recommendations.
- Fully compatible with Magento Open Source and Adobe Commerce environments.
