Product PDF Print - Magento 2

Installation

ⓘ You will require to install MageDelight Base Extension first. If it is not installed then please download it from https://www.magedelight.com /pub/extensions/magedelight-base.zip and unzip the package file into the root folder of your Magento 2 installation.

⚠ Product PDF Extension has dependency on **tcpdf library** so first you need to run below mentioned command

Run command **composer require tecnickcom/tcpdf** in Magento root

⚠ tecnickcom folder should have proper permission to current user

Please run below command to give proper permission to current user

sudo chown -R USER:USER PROJECTPATH/vendor/tecnickcom/

here USER -> Current user
PROJECTPATH -> Magento project installation path.

⊘ Before installing the extension, please make sure to **Backup your web directory and store database**

ⓘ You will require to install MageDelight Base Extension first. If it is not installed then please download it from https://www.magedelight.com /pub/extensions/magedelight-base.zip and unzip the package file into the root folder of your Magento 2 installation.

ⓘ

> ⓘ Root Directory is - **"app/code/magedelight/#YourExtensionName#"**

- Unzip the extension package file into the root folder of your Magento 2 installation.
- Connect to SSH console of your server:
    - Navigate to the root folder of your Magento 2 setup
    - Run command as per below sequence,

    php bin/magento setup:upgrade

    php bin/magento setup:di:compile

    php bin/magento setup:static-content:deploy

    php bin/magento cache:clean

- log out from the backend and log in again

> ⚠ If you are using Magento 2.3 or later then you do not need to activate license. Extension will be activated with silent activation mechanism and does not require activation keys to be entered manually.

Backend Functionality

PDF Catalog Booklet

The PDF catalog booklet feature provided as part of the PDF Product Print helps you to print to print the entire PDF catalog of the products on your Magento store.

HOW TO PRINT THE PDF CATALOG BOOKLET?

From the back-end of your Magento store, access "Catalog" from the Main Menu. Under the Catalog Menu, select **PDF catalog Booklet**. This will bring up the PDF catalog booklet screen. This screen consists of a tree of all the products that your store consists of, neatly divided into categories and sub categories.

To proceed, select the appropriate store view, if your store view has multiple views. Next, select the categories for which you need the PDF booklet. Once you have selected the categories and the respective subcategories, then go ahead and click on "PRINT PRODUCTS" orange button at the top right hand corner.

This will bring you to a new screen which brings up an indicator with a green extending bar saying "Wait – Catalog is preparing." Once the green bar completes, the catalog is ready for download. Click on the Click Here to Download product booklet link to download the catalog.

Frontend Functionality

Upon successful installation of this product, you will be able access this extension from the store frontend. If you desire a PDF printout of the product description, then simply follow the following steps.

- Click on your desired product to bring it up on your screen.
- This will display the product on your screen along with its related product description.
- Next to the "Add to Cart" Button, you will find the "Print Product" Button.
- Click on this button to generate the required PDF.
- This action will call up the save file dialog box.
- View or save the PDF file to your local disc.

PDF Printout – Various Elements that are displayed

Depending upon the back-end settings, you may be able to view the following elements as part of your PDF printout:

- QR Code for the product link
- Product Details
- Additional Information
- Related Product
- Up-sell Products
